THE BENCH a pipeline whose visual-content stage is explicit

Introductory passages → Subjectivity filtering → Redundancy detection → **Visual-content selection** → Chronological ordering

WHAT IS AUDITED the operations the field puts in this slot *as a quality filter*
16 from **11** source works, plus the **19** composites the literature publishes
alongside them, the deployed SIFT → BoVW → TF-IDF supplies the closed-form mechanism

FOUR COMPLEMENTARY TESTS

01 Constructed truth
20 segments, 800 paired decisions;
the better member fixed by construction.

02 External validation
KADID-10k, KonIQ-10k, LIVE In the Wild;
human opinion scores and controlled degradation levels.

03 Mechanism
Count × mean IDF weight;
19 extractor substitutions.

04 Decision sensitivity
42 clusters; how far the choice
of operation moves selections.
